Lead Dust Wipe Report

For: «Address_OneLineShip»
February 27, 2024

On 2/20/24, LEW Environmental Services, LLC (NJDC 00015 E) performed dust wipe sampling for the presence of lead at 351 Livingston Ave Unit 1 – New Brunswick, NJ 08901, (the “property”) in compliance with NJAC 5:28A. Eight (8) dust wipe (s) and one control blank were taken for dust level determination. We conducted our inspection in accordance with all federal, state, and municipal regulations. The regulations and inspection standards require that we plan and perform the inspection to obtain a reasonable assurance about whether or not the property is at risk from lead dust.

The maintenance and the environmental conditions of the property are the responsibility of the property’s management, principals, or owners. If the property, program, or any of its tenants receive financial federal assistance, the results of this evaluation must be provided by the designated party (client) to the owner of the referenced property and the occupants within 15 calendar days of the date when the designated party receives this report or makes the presumption that lead-based paint hazards exist, per the Department of Housing and Urban Development 24 CFR Part 35.125.

All dust wipes tested are not considered actionable for lead dust. Note: The property may still contain lead painted components and lead dust accumulation is possible.

Identified hazards shall be remediated using lead dust cleaning techniques by an EPA RRP certified firms using an EPA certified RRP Renovator. After completion of cleaning, a lead-based paint post-remediation with dust wipes will be required. The property may still contain lead painted components and additional lead dust accumulation is possible.

Lead Dust Hazard Standards

Floors (Bare and Carpeted)..... < 10 ug/ft²
Window Sill..... < 100 ug/ft²

Respectfully submitted,

Danny Feliciano
